Prix d'Excellence 2023 *PME*

CEJN France is awarded “Le Prix d’Excellence PME 2023” from the Swedish Chamber of Commerce in France, in recognition of its innovation capacity tailored to customer needs for a personalized service, and for its successful Swedish-French innovation collaborations, which engage bilateral R&D teams, and serve a number of French companies across multiple domains.

CEJN, acronym for founder Carl Erik Josef Nyberg, is a Swedish third-generation family-owned global company specializing in quick connect solutions for pneumatic, hydraulic, and other fluidic systems at medium and high pressure in industrial environments.

The company's expertise extends across various industries, including construction, manufacturing, and energy production, with advanced applications in semiconductor manufacturing, hydrogen production, power electronics, digital transmitter cooling, and more. Innovation closely tailored to customer needs for personalized service is one of the key differentiating factors for CEJN compared to the competition.

The French subsidiary has experienced rapid growth, as evidenced by a 50% increase in revenue over the past five years. France is one of the four target markets for the company globally.
